

MOHAMAD AMIRUL HELMI BIN SAMSUL KAMAL

Ipoh, Perak | (+60)11-37267929 | aamieyruljr@gmail.com

PROFILE

Recent Bachelor of Computer Science (Hons.) in Netcentric Computing graduate seeking opportunities in Software Development, Web Development, or IT-related roles. Experienced in software development, web application development, database management, and system implementation through academic projects and a 14-week internship at MADANI IT EXPERTS COMPANY. Contributed to the development of a Contractor Management System for Lembaga Air Perak and a Tadika Alumni Application, while also developing a Smart Attendance System Using Fingerprint Recognition for Computer Science Students at UiTM Arau as a Final Year Project. Proficient in Laravel, PHP, MySQL, JavaScript, HTML, CSS, and modern software development practices. Strong analytical, problem-solving, communication, and teamwork skills with a passion for building reliable and user-friendly software solutions.

PERSONAL DETAILS

Date of Birth : 21st September 2001
Age : 25 Years Old
Marital Status : Single
Nationality : Malaysian

EDUCATION

Universiti Teknologi MARA (UiTM), Arau Bachelor of Computer Science (Hons.) in Netcentric Computing	Mar 2022 – July 2026
Sekolah Menengah Toh Muda Abdul Aziz Sijil Tinggi Pelajaran Malaysia (STPM)	Aug 2019 – Mar 2021
Sekolah Menengah Toh Muda Abdul Aziz Sijil Pelajaran Malaysia (SPM)	2018

SKILLS

Programming Languages:

- Proficient in languages such as Python, Java, C++, and PHP.

Web Development:

- Skilled in HTML, CSS, JavaScript, and PHP for front-end and back-end web development.

Database Management:

- Experience with MySQL, SQL, and database design.

Operating Systems:

- Proficient in Windows, Linux, and macOS environments.

WORK EXPERIENCE

Software Engineer | MADANI IT EXPERTS SDN. BHD.

July 2026 – Present

- Developed and maintained web-based systems using Laravel, PHP, JavaScript, HTML, CSS, and MySQL.
- Designed, developed, and enhanced system modules based on client and organizational requirements.
- Managed and contributed to multiple software development projects from requirement analysis to implementation, testing, and deployment.
- Performed system testing, debugging, troubleshooting, and database management to ensure system performance and reliability.
- Collaborated with team members and stakeholders to gather requirements and deliver effective software solutions.
-

Key Project: EMOS – Exam Monitoring System

- Currently leading and managing the development of an Exam Monitoring System (EMOS).
- Developing features for CCTV-based examination monitoring and AI-powered detection.
- Designed system modules for managing examinations, students, invigilators, examination halls, cameras, attendance, and incidents.
- Developed an administrative dashboard and monitoring interfaces to support examination management and surveillance.
- Contributed to the integration and implementation of AI-based video analysis for detecting potential examination-related incidents.

Programmer Intern | MADANI IT EXPERTS COMPANY

Contractor Management System (Lembaga Air Perak)

March 2026 – July 2026 (14 Weeks)

- Developed and maintained a Contractor Management System to support contractor registration, project monitoring, and contract management processes.
- Designed and enhanced system modules using Laravel, PHP, JavaScript, HTML, CSS, and MySQL.
- Assisted in database design and management to ensure efficient data storage and retrieval.
- Performed system testing, debugging, and troubleshooting to improve performance and reliability.

Tadika Alumni Application

March 2026 – July 2026 (14 Weeks)

- Assisted in developing a Flutter-based mobile application for alumni information management.
- Implemented new features and enhanced application functionality based on user requirements.
- Conducted testing and debugging to ensure application performance and reliability.

Freelance Web Developer (Laravel Platform)

2024 – Present

- Developed web applications using Laravel, PHP, MySQL, HTML, CSS, and JavaScript.
- Designed and implemented user authentication, CRUD modules, and database management systems.
- Created responsive user interfaces and improved system usability.
- Performed debugging, testing, and system optimization.
- Assisted students with deployment and technical documentation of their systems.

Freelance Academic and Technical Support

2024 – Present

- Prepared academic reports and technical documentation for student assignments and final year projects.
- Assisted students in writing structured reports including introduction, methodology, system design, and testing sections.
- Ensured reports complied with academic formatting and submission guidelines.
- Provided guidance on system documentation and presentation of technical content.

Part-Time Crew Member

June 2025 – Dec 2025

Llao Llao Aeon Kinta City, Ipoh

- Assisted in food preparation and kitchen operations to ensure smooth daily service.
- Maintained cleanliness and followed food safety and hygiene regulations.
- Supported team members during peak hours to ensure customer satisfaction.

Part-Time Kitchen Crew**Feb 2024 – Dec 2024*****DOREMI Sreamboat Restaurant Meru, Ipoh***

- Prepared frozen yogurt products according to standard operating procedures.
- Provided efficient and friendly customer service.
- Ensured outlet cleanliness and proper stock arrangement.

Part-Time Barista**June 2022 – Dec 2022*****McDonalds Klebang, Ipoh***

- Prepared beverages and food items according to company standards.
- Provided friendly and efficient customer service in a fast-paced environment.
- Maintained cleanliness and hygiene of the workstation and dining area.
- Assisted in handling cash transactions and order processing

Part-Time Catering Crew**2018*****Event Catering Service***

- Demonstrated teamwork, communication, and time management skills in high-pressure event environments.
- Followed strict hygiene and safety procedures while handling food and equipment.
- Assisted in event setup and breakdown within scheduled timelines.

Part-Time Burger Stall Assistant (Burger Vendor)**2016**

- Prepared and sold burgers to customers.
 - Handled customer orders and payments.
-

PROJECTS

Smart Attendance System using Fingerprint Recognition (Final Year Project)

Sep 2025 - Present

PHP, JavaScript, CSS, MySQL, Arduino IDE, Fingerprint Sensor

- Developed a web-based Smart Attendance System integrated with fingerprint recognition for secure and automated student attendance.
- Implemented fingerprint enrollment and authentication modules using Arduino microcontroller and biometric sensor.
- Designed and managed relational database for student profiles and attendance records using MySQL.
- Built system features including user login, attendance dashboard, report generation, and data validation.
- Applied software development lifecycle (SDLC) practices include system design, implementation, testing, and documentation.
- Improved accuracy and reduced proxy attendance through biometric verification technology.

Mobile Application for Estimating Electricity Bills (WattWizard)

Nov 2024

Android Studio, Java, XML

- Developed an Android application to estimate electricity bills based on user input, including energy usage (kWh) and rebate percentage.
- Added a system that applies different rates for specific blocks of electricity usage to ensure accurate billing.
- Created a simple and user-friendly interface with customized colours, app name, and unique icons.

Medal and Certificate design for Science and Technology

Sept 2024

Research Expo 2024 (SCITEX)(USIM)

Inkscape, Photoshop, PowerPoint

- Designed medals and certificates for the Science and Technology Research Expo 2024 (SCITEX) organized by USIM.
- Created high-quality digital assets aligned with the event's theme and branding requirements, suitable for printing and presentations.

Craft Coffee Café (GUI) System

Dec 2023

Java, Swing, JGRASP, BlueJ

- Developed a user-friendly Java-based GUI system for managing orders at Craft Coffee Café.
- Implemented features for staff to log in, take orders, calculate totals, and print receipts with ease.
- Designed a flexible interface allowing coffee customization (size, temperature, milk, and flavours).
- Gained hands-on experience in GUI design, object-oriented programming, and creating real-world solutions for operational challenges.

Train Booking System Mobile Application (Android)

Nov 2023

Android Studio, Java, XML, SQLite / Firebase

- Developed an Android mobile application for train ticket booking and reservation.
- Implemented core features including user registration, train search, seat booking, and booking history.
- Designed responsive and user-friendly interfaces using XML layouts.
- Integrated local/cloud database for storing user and booking data.
- Applied object-oriented programming (OOP) concepts in mobile application development.
